THING
DIGITAL

ThingD

A blockchain-based authentication platform
for physical and digital assets

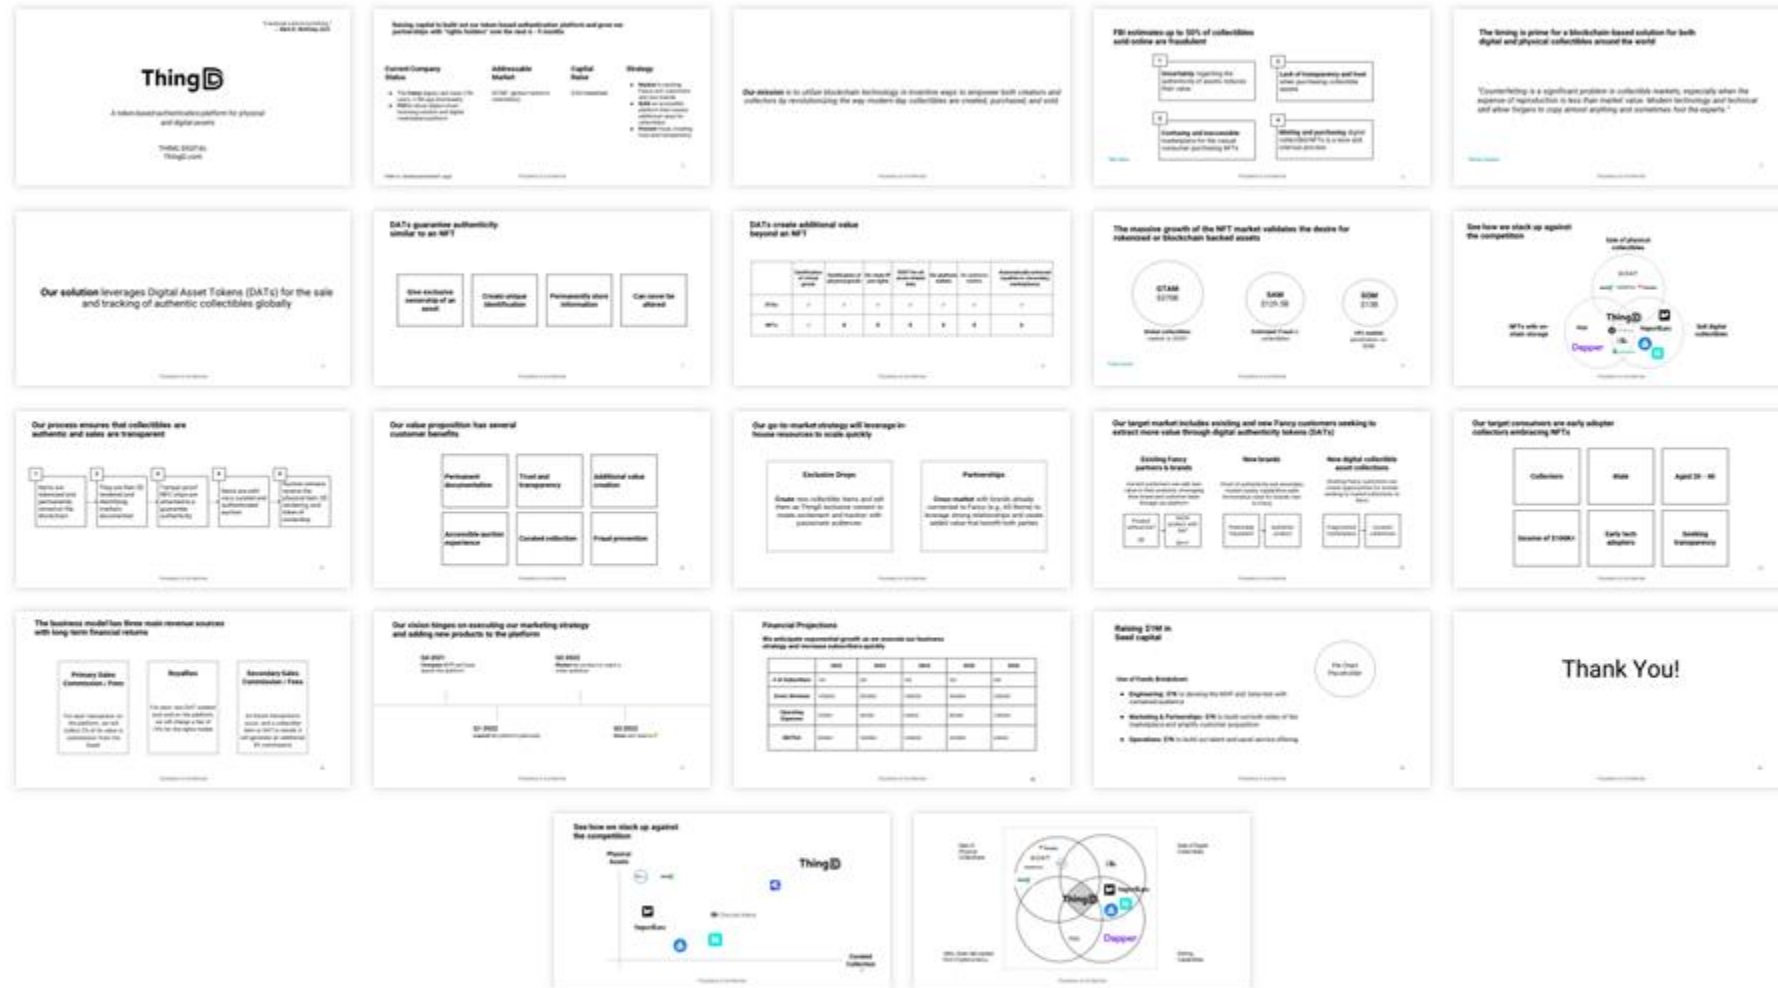

thingd.com

Raising pre-seed capital to build a MVP token-based authentication platform and establish initial market validation

Current Company Status

- The **Fancy** legacy user base (7M users, 2.5M app downloads)
- PDS's** robust digital smart licensing solution and digital marketplace platform

ADDRESSABLE MARKET¹
\$370B¹
(global market in collectibles)

Capital Raise
\$500K
Investment

Strategy

- Capitalize on the rapid growth of NFT based collectibles with a unique hybrid solution.
- Accelerate time to market with PDS's blockchain-enabled API platform.
- Cross market to legacy Fancy users who fit our target demographic.

ThingD

ThingD

Our mission is to utilize blockchain technology to revolutionize the way collectibles and luxury items are created, purchased, and sold.

The timing is prime for a blockchain-based solution for physical collectibles and luxury goods

01 Forbes estimates there are 200M global collectors and a market value of \$370B

02 Modern technology and technical skill allow forgers to copy almost anything

03 FBI estimates up to 50% of collectibles and luxury items sold online are fraudulent

04 NFTs have educated the market on how tokenization can create an immutable record of authenticity and provenance

4

ThingD

ThingD

Our solution leverages Digital Authenticity Token (DATs) for the sale and tracking of authentic collectibles and luxury items globally

We make it possible for consumers to access product history and proof of authenticity – from sourcing to sales, through second-hand markets

DATs guarantee authenticity similar to an NFT

- Give exclusive ownership of an asset
- Create unique identification
- Permanently store information
- Can never be altered

6

ThingD

DATs create additional value beyond an NFT

	DTAs	NFTs
Certification of virtual goods	✓	✓
Certification of physical goods	✓	✗
On-chain IP use rights	✓	✗
SSOT for all asset related data	✓	✗
On-platform wallets	✓	✗
Automatically enforced royalties in secondary marketplaces	✓	✗

7

ThingD

The massive growth of the NFT market validates the desire for tokenized or blockchain backed assets

ThingD

See how we stack up against the competition

9

ThingD

Our process ensures that collectibles are authentic, and sales are transparent

- 01 Items are tokenized and permanently stored on the blockchain
- 02 They are then 3D rendered and identifying markers documented
- 03 Tamper-proof NFC chips are attached to a guarantee authenticity
- 04 Items are sold via a curated and authenticated auction
- 05 Auction winners receive the physical item, 3D rendering, and token of ownership

10

ThingD

Our value proposition has several CUSTOMER BENEFITS

11

ThingD

Our go-to-market strategy will leverage legacy Fancy assets to scale quickly

- Exclusive Drops**
Create new collectible items with strategic partners and sell them as ThingD exclusive content to create excitement and traction with passionate audiences
- License**
Partner with brands and "rights holders" to use ThingD technology to sell goods through 3rd party locations such as eBay and Shopify.
- Cross-Market**
Tap into our 7M legacy users who used to view Fancy as the place to find high-end collectibles and luxury goods

12

ThingD

ThingD Creates Value

Partners & Collectors

Proof of authenticity and secondary market royalty capabilities adds tremendous value for rights-holders and collectors

Benefits for Collectors

- Proving authenticity & ownership of goods
- Accessing product history information
- Strengthening rights holder relationships through enhanced transparency

Benefits for Brands and Rights Holders

- Building collectors trust (with no intermediaries)
- Protecting markets against counterfeiting, controlling second hand markets

13

ThingD

Our target consumers are early adopters who have already embraced blockchain and NFTs.

Collectors	Male	Aged 20 - 40
Income of \$100K+	Early tech adopters	Seeking transparency

14

ThingD

The business model has three main revenue sources with long-term financial returns

Primary Sales Commission/Fees

For each transaction, we will collect 2% of its value in commission from the buyer

01

Royalties

For each new DAT sold, we will charge a fee of 15% to the brand or rights holder

02

Secondary Sales Commission/Fees

As future transactions occur, and a ThingD DAT is resold, it will generate an additional 5% commission

03

15

ThingD

Our vision hinges on executing our marketing strategy and adding new products to the platform

16

ThingD

Raising \$500K in Pre-Seed capital

USE OF FUNDS BREAKDOWN

\$300K

Engineering:

to develop the MVP and beta version with contained audience

\$100K

Marketing & Partnerships:

to build-out both sides of the marketplace and amplify customer acquisition

\$100K

Operations:

to build out talent and scale service offering
